

Plan for the repayment

The loan is going to be paid back in _____ monthly rates with the amount of _____ € (in words: _____ Euro) until its full repayment worth of _____ € (in words: _____).

The repayment for the debit is going to start at the _____ and is going to be paid back by the _____.

I am aware of the option to pay back the debit through a one-off-payment at any time and I am also aware that I can change the height of the repayment-rates for one time and only in previous consultation with the Finanzreferat.

In case my/our bank-account does not hold the required amount for the agreed repayment-rate (see above) there is no obligation for the credit institution that holds my/our account to take responsibility of the claimed payment/payment-rate.

Any fees that apply for the AstA der Universität Trier by any credit-institute, because of an account with no funds, will be added to the open debit and have to be paid back in full by the debtor.

Trier, the _____
